

<b>Code</b>	<b>Definition/Application Criteria</b>	<b>Remarks</b>
ASGEN	As generated. This code is similar to ASREQ, where the triggering event is specifically identified "as the data are generated."	Provide specific instructions in Block 16
ASREQ	As required. ASREQ implies a condition tied to an event. The frequency of occurrence of the event is usually unknown.	Provide specific instructions in Block 16
DFDEL	Deferred delivery. Applied when the data requirement is known but the specific time or place of delivery has not yet been determined. It is supported by invoking DFARS Subpart 252.227-7026.	Provide specific instructions in Block 16
EOC	End of contract	Applies to a delivery not required until the end of the contract
EOM	End of month	
EOQ	End of quarter	
XDARP	Days after reporting period	A number must be inserted in place of the X
XDAC	Days after contract start	A number must be inserted in place of the X
XDACM	Day after contract modification	Similar to XDAC, XDACM distinguishes between original contract requirements tied to contract award and new requirements resulting from a contract modification
XDARC	Days after receipt of comments. Used when the contractor's submission is contingent on input or feedback from the government or another source.	A number must be inserted in place of the X
XDATC	Day after test completion	A number must be inserted in place of the X
XDPTT	Days prior to testing. Applicable to test-related data required before testing, such as plans, schedules, and procedures.	A number must be inserted in place of the X
XDADO	Days after delivery order	A number must be inserted in place of the X
