REQUIREMENTS DOCUMENT WIZARD (RDW)

The RDW guides users through the creation of requirements documents based on proscribed formats (e.g. JCIDS, ACIDS, etc.) in an easy-to-use interface.

Learn more [here](#)!

1 Emulates all the Microsoft Word functionality relevant to writing requirements documents, such as:

- Creating, saving, editing, deleting, and retrieving documents
- Rich Text format (e.g. ability to bold, underline, italicize, use red or black font, etc.)
- Copying and pasting from other documents
- Inserting picture-type files
- Creating, populating, and manipulating a table
- Spell check

2 Enforces policy-relevant constraints for both style and content

- Pre-populates document section headers (User will have the ability to modify)
- Ensures use of correct font and size
- Pre-set margins, page order, automated table of contents

3 Fuses all requirements document-relevant content, expert-curated help text and tips, and document examples into a single screen—no more swivel chair!

- Acutal word-for-word policy documentation at the click of a button (e.g. actual JCIDS manual content, Component-specific regulations, etc.)
- Additional help text and points of emphasis expertly curated by DAU, the Joint Staff, and Components
- Help material can be bookmarked for future reference, JCIDS manual can be opened and searched from application.
